**DETAILED ACTION**

***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 5/7/2007 has been entered.

***35 U.S.C.101***

2. Claims 1-8 are statutory with respect to 35 U.S.C. 101 because the claims recite a useful, tangible, concrete result (generating a state speech model representing extracted input speech) which meets the current guidance regarding the 35 U.S.C. 101 Interim Guidelines.

***Allowable Subject Matter***

3. Claims 1-8 are allowed over the prior art of record.

4. The following is an examiner's statement of reasons for allowance:

As per claim 1-8, the independent claims pertaining to the generation of a model based upon the state that said data do not exist, on the basis of the noise that has been input at the time

Art Unit: 2626

just preceding the inputting of said data, and then updating the corresponding one that has been stored on said storing step; and measuring a variation of correct speech recognition rate during a time period between activation of a switch and the beginning of speech is not explicitly taught by the prior art of record. With respect to the prior art of record, Chiang teaches a parallel model combination (PMC) circuit (elem. 16, FIG. 3) for generating and storing adapted (updated) HMMs (elem. 14, FIG. 14) based on the noise extracted from the immediately collected input data (col. 4, lines 5-7), however, Chiang does not disclose extracting noise from input just preceding the input of speech data. Erell et al. teaches extracting background noise speech vector right before speech utterance is spoken. (Col. 6, lines 9-12), but does not teach measuring a variation of correct speech recognition rate during a time period between activation of a switch and the beginning of speech. Furthermore, it would not have been obvious to one of ordinary skill in the art of speech signal processing to modify the teachings of the prior art of record to obtain the recited limitations of the independent claims as noted above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
